

Community consultation on the Multi-Annual Roadmap 2023-24

This survey is intended to gather community feedback on the multi-annual roadmap for 2023-24. The MAR outlines priority activities to be pursued in the implementation of EOSC. These priorities are assigned to three levels of action: European, national and institutional. Priorities cover the technical developments needed, as well as policy and recognition frameworks to support the development of Open Science skills and roles.

Questions are structured according to the three objectives agreed in the SRIA, namely:

1. Ensure that Open Science practices and skills are rewarded and taught, becoming the 'new normal'
2. Enable the definition and adoption of standards, and the development of tools and services, to allow researchers to find, access, reuse and combine results
3. Establish a sustainable and federated infrastructure enabling open sharing of scientific results

Please consult the MAR to review the priority activities and outcomes to respond: [EOSC Multi-Annual Roadmap 2023-24 \(link\)](#).
