eosc Seven new Horizon Europe INFRAEOSC projects launched in Q1 2024

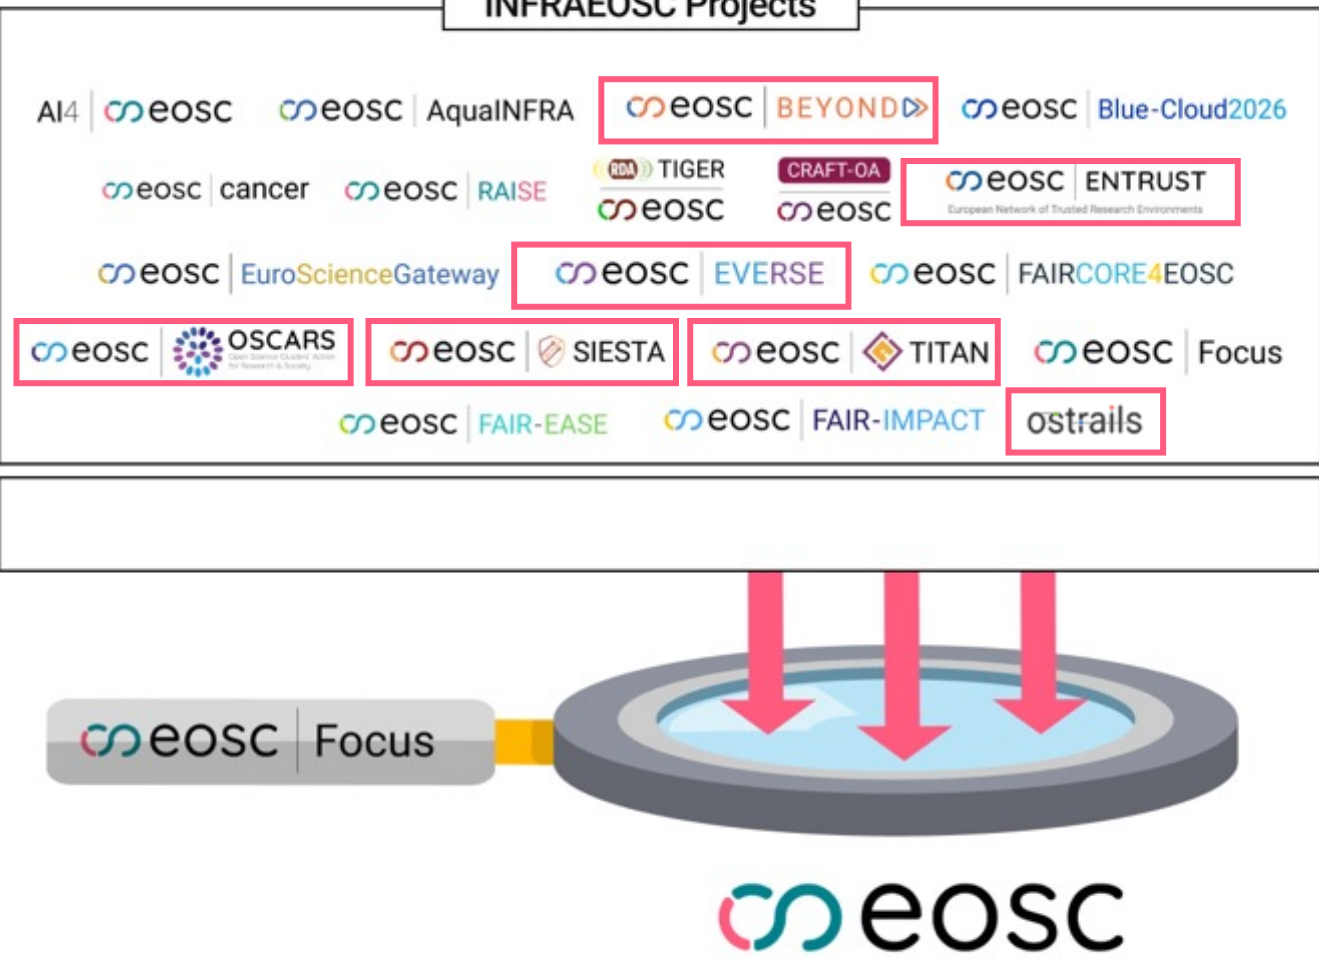

EOOSC Community - Summer 2021

A collage of various logos representing the EOOSC community in Summer 2021. The logos include: EOSC SYNERGY, EOSCsecretariat.eu, FAIRSFAR, panosc, ESCAPE, DiCE, ESI-RICE, OpenAIRE, ENVRI, EOSC-Life, EOSC NORDIC, EOSC Future, EOSC, Reliance, EOSC-Pillar, SSHOC, O-GOALS, and NIXOS Europe. A large blue bracket at the bottom of the collage points to the logo for the EUROPEAN OPEN SCIENCE CLOUD, which features a blue cloud icon and the text "EUROPEAN OPEN SCIENCE CLOUD" next to a circle of yellow stars.

EOOSC Community - 2023/2024

INFRAEOSC Projects

A diagram showing various INFRAEOSC projects feeding into the EOOSC Focus platform. The projects are arranged in rows, with some highlighted by red boxes. The projects include: AI4, eosc, AqualNFRA, eosc | BEYOND, eosc | Blue-Cloud2026, eosc | cancer, eosc | RAISE, RDA TIGER, CRAFT-OA, eosc | ENTRUST (European Network of Trusted Research Environments), eosc | EuroScienceGateway, eosc | EVERSE, eosc | FAIRCORE4EOOSC, eosc | OSCARS (Open Science Clouds Action for Research & Society), eosc | SIESTA, eosc | TITAN, eosc | Focus, eosc | FAIR-EASE, eosc | FAIR-IMPACT, and ostrails. Below the projects, a grey bar labeled "eosc | Focus" is connected to a circular platform. Three red arrows point down into the platform, and the "eosc" logo is positioned below the platform.

Winter School 2024

29 January - 1 February 2024
Thessaloniki, Greece

Report on the EOSC Winter School

2024

29 January -
1 February 2024

Thessaloniki, Greece

7. Lessons learnt from the first EOSC Winter School and conclusion

The organisation of the first EOSC Winter School as a first attempt with this format yielded satisfactory results indicating progress in the desired direction. It is important to assemble a diverse group comprising members from various EOSC-related projects, EOSC-A Task Forces (TFs), EOSC-A Board of Directors (BoD), European Commission (EC), and other stakeholders to ensure comprehensive perspectives are brought to the table during discussions.

Facilitating the Opportunity Areas, including the HE Impact Group, e.g., with report templates, is essential for capturing results and proper documentation. Additional input from the HE Technology Group, Opportunity Areas and EOSC-A Task Force co-chairs is necessary to translate the outcomes into a work plan. The HE Technology WG has effectively initiated discussions with EOSC-related projects regarding collaborative opportunities. While this shows potential for shaping the development of a unified EOSC, it remains in an early stage of maturity. The HE Impact WG on EOSC Forum has grown from 25 to 48 members after the WinterSchool; a continuous engagement plan is being prepared through EOSC Focus WP4.

An emerging work plan for collaboration among HE EOSC-related projects is underway, albeit requiring further refinement for solid establishment. It is advisable to repeat the Winter School with appropriate adjustments to goals, format, and methodology.

The Coordination Meeting with the EC in mid/end-June 2024 and the 2024 EOSC Symposium in October serve as opportune moments to evaluate the success of the collaborations initiated.

The HE Technology Group remains the primary platform for all EOSC-related projects to participate, ensuring alignment on the facing EOSC's key technical challenges.

Wednesday afternoon:

- Case study - evaluating the RAI ID (developed by RAISE) against the EOSC PID Policy
- Validation of the policy with respect to intrinsic PIDs (aimed at authenticity and integrity)

Discussion highlights:

- Holistic alignment on EOSC PID policy update and implementation (from governance, grant proposal to assessment)
- Differences between maintenance of well established PID infrastructures vs emerging PIDs
- Differences/tensions between OPEN and FAIR

Recommendations

- Certification Authority for PID CAT: need for a mandate/authority to take over the certification
- Require PID Policy reference for new projects implementing new PIDs: if new PIDs are planned in project proposals, there should be a reference to PID policy
- Transition period to new EOSC-A designated authority group: formalisation of commitments and responsibilities
- Encourage adoption of community governed sustainable PID infrastructures: Fund and enforce adoption of existing PID systems that are aligned with the EOSC PID policy
- Shifting from creating PID systems to those services built on top of them
- Explore the federation of research graphs, and querying over federated graphs: defining value through use cases (exploiting the potential of PID graphs)

3.2 / OA2: Metadata, Ontologies & Interoperability

Tuesday afternoon:

- Opportunity Area Matrix: SRIA-challenges covered/not-covered by EOSC-related project activities and examples of solutions.
- Task Force Results: Reference architecture, interoperability profiles, maturity for semantic artefact catalogues, mappings and crosswalks, shared/common use cases.
- SRIA 2.0 and future Task Forces: Task force deliverables and associated recommendations can serve as a conversation starter.

Opportunity Area Expert Groups

Strategic Instrument for Collaboration

- Opportunity Area Expert Groups are designed to maximize the impact of HE EOSC-related projects through strategic collaboration and co-creation of outputs with experts from the EOSC-A Task Forces.
- By facilitating collaboration between and outside the projects, which each have their individual objectives, Opportunity Area Expert Groups generate significant added value. They enhance the broader community's ability to solve specific challenges in the development of EOSC, making EU-funded projects more impactful.
- They maintain a dynamic work plan that is continuously adapted to the influx of new projects and members to meet the evolving needs of the EOSC community.
- They are open to members of former EOSC-A Task Forces.

Q&A

EOSC Federation Handbook

Progress updated by the EOSC Association Board

Aim

Prepare a handbook for the **EOSC Federation of Nodes** which covers the essential aspects of the purpose of the federation, what a node is, how to join, rules of governance, value proposition and rules of participation

Who

Driven by the EOSC-A and contributors from all interested parties (EC, Member states/ACs, RIs, EOSC-A members, etc.) who volunteered to participate in the co-creation of the Handbook

Process

The document is being written collaboratively with weekly meetups, open consultations, and sprints

Volunteers

33 volunteers expressed their interest and willingness to write. After evaluating their CVs a total of **28** were selected. They are organised in two groups – Writers and Reviewers.

Writers

The writers had their kick-off meeting on **6 June**. Meet weekly to discuss progress & distribute tasks.

- First task was to write a **mission statement** for the EOSC Federation.
- Now writing the first chapter on “**Purpose of the EOSC Federation**” collectively. Multiple writers are assigned to each section.

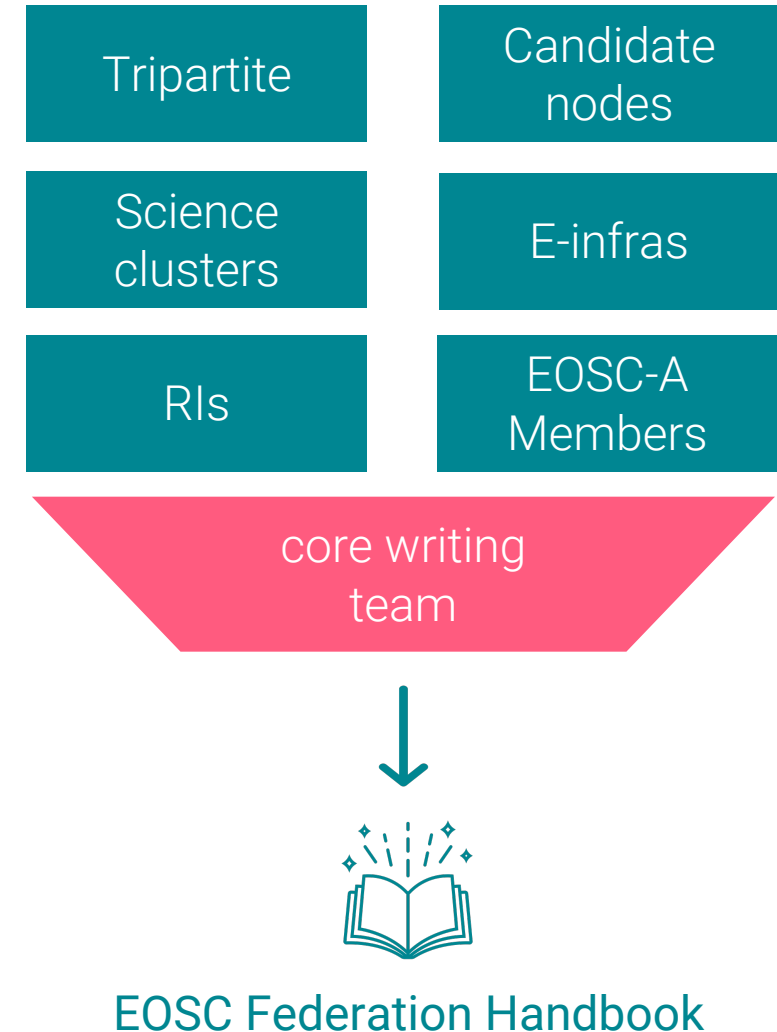

Reviewers

The reviewers will meet end of June for the first time to review the first chapter.

Actors

- Tripartite governance (**Reviewers**)
- EOSC-A membership (**15 Writers**)
- Candidate nodes (*not identified yet*)
- RIs/Science clusters (**5 Writers**)
- E-infras (**5 Writers**)
- EOSC projects (**10 Writers**)
- Member states (**5 Writers, 1 Reviewer**)
- etc.

- **Purpose [June]**
 - Goals & purpose of EOSC Federation
 - Success criteria for the Federation
- **Operational structure and responsibilities [July]**
 - Federating Entity
 - Nodes
 - Use Cases
- **Governance and legal framework [September]**
 - Governance structure
 - Legal framework
 - Policies (Rules of Participation, Access Policy, Acceptable Usage Policy, ELSI, IP, etc.)
 - Communication and External Relations
 - Risk management
- **EOSC platform [October]**
 - FAIR Data & Services (Core, Exchange)
 - Interoperability (EOSC Interoperability Framework)
 - Provisions for cybersecurity coordination
 - Links to external entities (e.g. other data spaces, EuroHPC, etc.)
 - Scientific services (discovery)
 - Training
- **Technical Operations [November]**
 - Linking to EU Node services

eosc EOSC Federation Handbook – Chapter 1 Purpose

- **Outline**
 - Chapter 1 – Purpose of the EOSC Federation
 - Vision
 - Mission
 - Purpose and advantages
 - Users
 - Outcomes
 - Scope of Handbook
- **Progress** – writers actively contributing (10 pages already)

Planning

- *January 2024* – Preliminary draft of Handbook outline prepared with EOSC Focus
- *March 2024* – Kick-off of Handbook writing process with core team (EOSC-A + EOSC Focus)
- *April 2024* – Preliminary discussion of EOSC Node during the Tripartite meeting
- *May 2024* – Call for Contributors to Handbook and selection of Writers + Reviewers
- *May 2024* – Breakout Session at EOSC-A General Assembly to gather feedback
- June 2024 – Kickoff meeting of Handbook Writers team and started writing Chapter 1
- 1 July 2024 – Preliminary draft of Chapter 1 to be discussed at Tripartite Group meeting
- July 2024 – Preliminary draft of Chapter 2
- Sept' 2024 – Preliminary draft of Chapter 3
- Sept' 2024 – Open consultation meeting on Handbook
- October 2024 – Preliminary draft of Chapter 4
- October 2024 – Draft of Handbook presented at EOSC Symposium '24
- Nov'2024 – Preliminary draft of Chapter 5
- Nov' 2024 – Mature draft of Handbook to be endorsed at next Tripartite meeting

eosc EOSC GA#8 Breakout Session Q&A

- **GA#8 Breakout Sessions** – during the GA#8 two breakout sessions were organised for 3 groups. The goal of the breakout sessions was to gather questions and feedback to be answered in the EOSC Federation Handbook.
- **Questions** – A total of 151 questions were gathered and have been classified by chapter. Roughly 50 questions concern the first chapter on Purpose.
- **Answers** – The EOSC-A editing team together with the writers are addressing the questions and using the answers as input material for the first chapter

Building the EOSC Federation: Requirements for EOSC Nodes

https://eosc.eu/wp-content/uploads/2024/05/EOSC-A_GA8_20240527-28_Paper-G_Update_EOSC_Nodes_requirements-DRAFT-v240524.pdf

Building the EOSC Federation: requirements for EOSC Nodes

[draft v 24/5]

Disclaimer: This document is primarily addressing entities interested in enrolling as EOSC Nodes. The requirements will evolve during the uptake of the EOSC Federation and are planned to be specified in the EOSC Federation Handbook. The document is not about the onboarding of service providers to EOSC Nodes, and it does not elaborate on the steps to be taken for the uptake of the EOSC Federation.

The European Open Science Cloud (EOSC), the Common European Data Space for R&I¹, is the EU's flagship initiative for the digital transformation of research.

The vision for EOSC is to put in place a system for researchers in Europe to store, share, process, analyse and reuse, within and across disciplines and borders, FAIR research outputs, such as research data, publications and software.

It is rooted in open science and deployed as a network between data repositories and services of research infrastructures and other scientific service providers to develop a trusted federation of research data and services for R&I in Europe. The development of the building blocks of the EOSC Federation will count on the latest community know-how, adopting and building on well-established and well-functioning existing structures and frameworks.

EOSC is transitioning to a fully operational mode: the EC-procured 'Managed Services for the EOSC Platform'² are currently being developed and gradually put in operation under the branding of the EOSC EU Node², making it the first node of the EOSC Federation.

At the same time, partly through investments by the EU, its Member States and Horizon Europe associated countries, several thematic communities and national initiatives are maturing their infrastructures and services for EOSC readiness.

The EOSC Nodes will be the entry points for end users to the entire EOSC Federation, with each node offering its own services (including data reposing and accessing services) and possibly services of other providers ('third-party' services onboarded to the EOSC Node), in compliance with the EOSC Federation's common rules and requirements as well as the own policies of the EOSC Node. An organisation may therefore enrol its activities as an EOSC Node in the EOSC Federation or onboard its services on an existing EOSC Node as a provider.

These nodes will thus offer (scientific) services and/or data that adhere to the FAIR principles, including curated research outputs (such as publications, datasets, software, etc.), specialised

¹ <https://digital-strategy.ec.europa.eu/en/library/second-staff-working-document-data-spaces>

² <https://open-science-cloud.ec.europa.eu/>

and/or platform services, and/or data processing

EOSC Federation as nodes will benefit from:

By enrolling in the EOSC Federation as nodes, Member States and especially beyond their national focus, enabling innovative use and exploitation of research data and services, and especially expanding beyond research to industry and the wider economy. Nodes will also benefit from the ability to connect to the other currently deployed Common European Data Spaces. Nodes will profit from a much broader access to FAIR data and services. Nodes will also benefit from their own contributions to the EOSC Federation.

Nodes will be able to take advantage of commonly pooled resources and services, such as AAI, resource catalogues and registry services, reducing duplication of research and development activities and their business models.

Nodes will be able to contribute to the development of organisations enrolling nodes in the EOSC Federation and to the latest European standards for research output and data. Nodes will seamlessly comply with EU research and digital transformation rules and policies.

Nodes will be able to contribute to the development of organisations to enrol as EOSC Nodes or to be considered as nodes of the EOSC Federation.

Nodes will ensure the quality of services offered by and to other nodes and will assume specific responsibilities towards other EOSC Nodes, towards their end users.

Nodes will be responsible for an EOSC Node aim to ensure that it has the legal capacity to take up this responsibility and to be compliant with the development of EOSC according to its long-term vision.

The legal entity responsible for the EOSC Node must be a public-benefit legal entity (such as a Member State or an associated country) with legal personality recognised in all Member States and associated countries, or a research organisation of European interest. The legal entity must include possible agreements with other partners and be able to enter into agreements with other nodes and/or with a potential future partner.

Nodes will be able to provide services at the discretion of the research communities, operating in a non-commercial manner.

Nodes will be responsible for the candidate EOSC Node must have the authority to establish and manage the node, and to ensure that these services are provided in accordance with the standards, rules, and policies of the federation, including transparency, and trustworthiness of these services.

Nodes will have the capacity to provide services beyond offering its own services, an EOSC Node shall have the capacity to offer or share within the federation capabilities to be offered across the federation such as infrastructure, resource catalogues and registry services, and helpdesk.

Nodes will be able to select which services they offer or share within the federation and to provide action plan to ensure compliance with the policies for access and use of these services, including access rules, including the EOSC interoperability standards and sovereignty standards.

Nodes will be able to monitor and report the activity of the EOSC Federation (e.g. monitoring usage of data, services and the quality of the provided services, including the compliance with the Federation's policies and standards).

Nodes will strive to contribute to community engagement activities such as training activities, consultations, usability testing, and surveys.

Nodes will be able to confirm continued operations compliant to the EOSC Federation and they shall be transparent about their measures to ensure the quality of the provided services.

Nodes will be refined and elaborated in the months to come. Estimates about costs and benefits of candidate nodes.

Candidate EOSC Nodes'

A mass of prospective EOSC Nodes, possibly including thematic nodes, (single sited and/or multi-sited), or e-infrastructure nodes, and then to progressively increase the number of more prospective nodes and to evolve the EOSC Federation based on the experience gained by the initial operation of the EOSC Federation.

EOSC Nodes are a subset of the requirements for EOSC Federation, sustainability, core capabilities/service provision

presenting the candidate EOSC Node must have the authority to establish

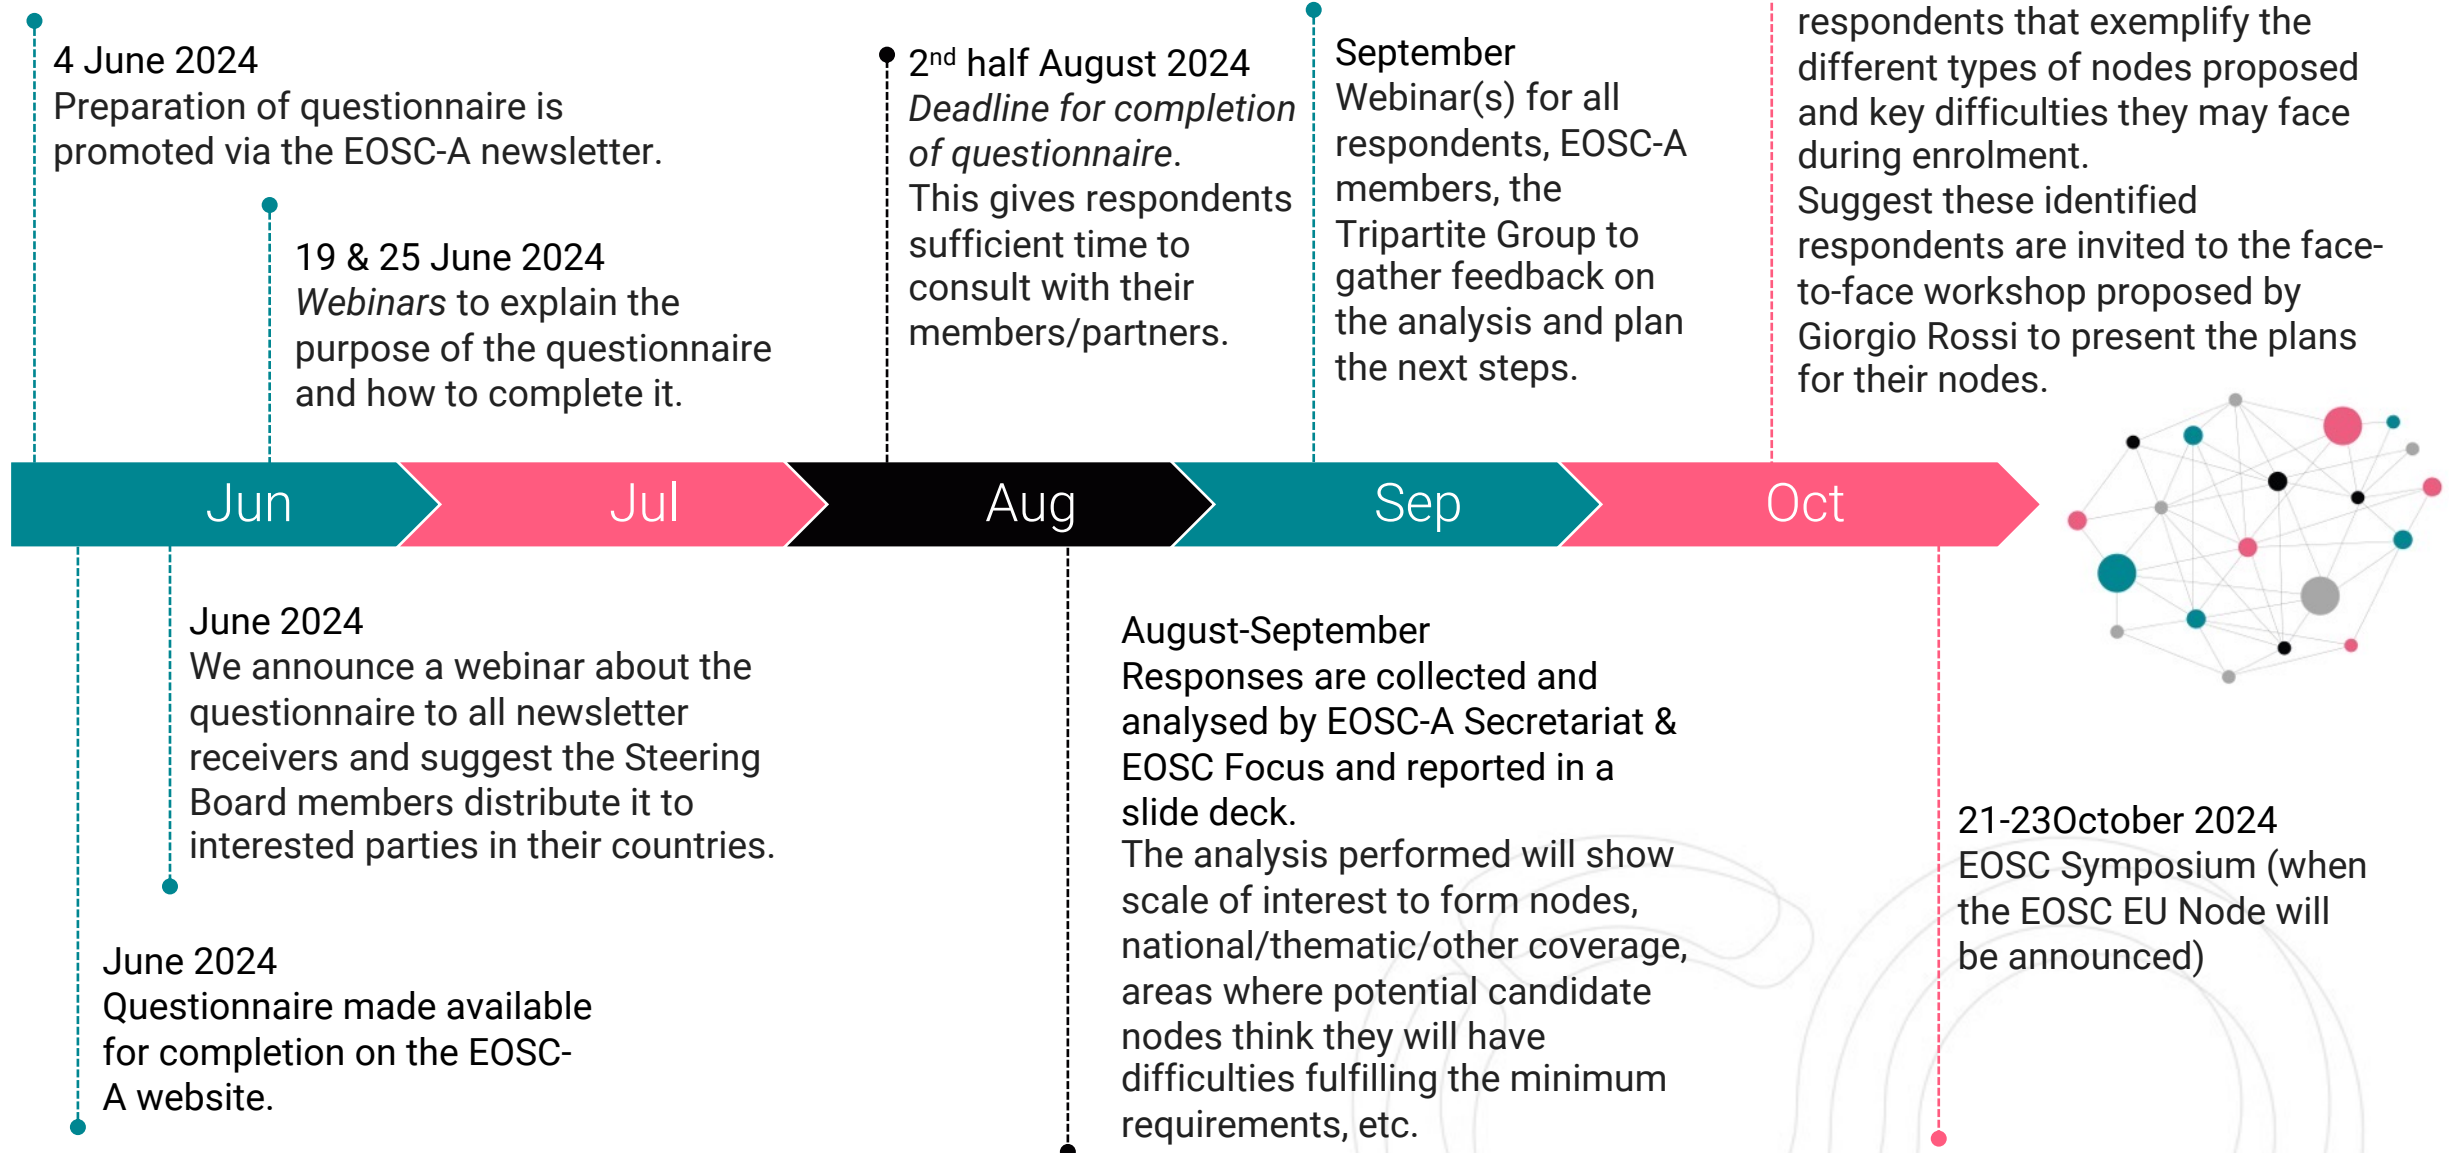

responsible for the candidate EOSC Node should commit to providing services to ensure its operation for at least 24 months, ideally for 5 years or more.

EOSC Node must have sufficient capacity and expertise to be able to ensure that the services it includes can be operated at a sufficiently high Technology and Innovation level, ensuring robust, reliable and secure performance.

Services must be at least findable and accessible to registered EOSC users and to the general public, while services such as compute and storage capacity must be in sufficient quantities to multiple user groups.

Status:
24.05.2024

eosc Proposed timeline

[Home](#) / [EOSC](#) / [Building the EOSC Federation](#) / [Questionnaire: Build-up phas...](#)

Questionnaire for parties interested in contributing to the build-up phase of the EOSC Federation

The construction of the future EOSC has entered an important phase. The EOSC EU Node is expected to be presented to the scientific community in the frame of the EOSC Symposium in October 2024. Meanwhile, the discussions are intensifying on the aims, structure and tasks of the individual EOSC Nodes that will complement the EOSC EU Node to initiate the formation of the EOSC Federation.

The Tripartite Governance of EOSC is therefore launching a questionnaire to gauge the scale and scope of general interest and readiness for the build-up phase of the EOSC Federation. Interested parties are invited to reply to the questionnaire as the first step in their eligibility to contribute to a testbed of potential EOSC Nodes representing the different stakeholders involved in the research communities of Europe.

Based on the replies to the questionnaire, several organisations will be invited by the Tripartite Governance to contribute to the refinement of the EOSC Federation concept during the build-up phase. The build-up phase will help the Tripartite to gain experience from cooperation between the future EOSC EU Node and the individual future EOSC Nodes, and to test the different aspects of the [EOSC Federation Handbook](#) in practice. The invited organisations shall reflect the different types of stakeholders and organisations to ensure the best possible representation of the various European research communities.

WEBINARS FOR PARTIES INTERESTED IN BUILDING UP THE EOSC FEDERATION

<https://eosc.eu/eosc-about/building-the-eosc-federation/questionnaire-for-parties-interested-in-contributing-to-the-build-up-phase-of-the-eosc-federation/#briefingpapers>

eosc Questionnaire – Important to notice

No additional funding is associated with this activity. Submitting the questionnaire does not commit the respondent to onboard their resources (i.e. services/data repositories) nor to establish a future EOSC Node. At the same time, the invitation to form a node in the build-up phase does not automatically guarantee the status of a federated EOSC Node at a later stage. The decision of the future structure, organisation and funding of EOSC will follow the negotiations of the next European Framework Programme for Research and Innovation, FP10.

WEBINARS FOR PARTIES INTERESTED IN BUILDING UP THE EOSC FEDERATION

The EOSC Association will hold two webinars in June to explain the purpose of the questionnaire and provide guidance on how to complete it. [Registration is required to attend](#). Interested participants can choose from the following dates and times:

- **Wednesday, 19 June 2024, 15:00-16:00 CEST**
- **Tuesday, 25 June 2024, 15:00-16:00 CEST**

1. Do you intend to offer your institutional resources through a future EOSC Node of the EOSC Federation?
2. Do you wish to join the build-up phase with the intention to build a potential future EOSC Node?
3. Are you able to identify the legal entity that would assume legal responsibility for the potential EOSC node?
4. Please list the resources your organisation intends to make available via the node (text list, for each entry give the TRL (1-9) and any restrictions that apply to use of the resource) and describe their added value to the EOSC Federation.

5. Are all these resources owned/operated by your organisation (yes/no)?
If no, please indicate the owner/operators (text, select country)
6. Please estimate when you would be able to start offering resources to the EOSC Federation? (month/year)
7. What support/competences/training will be offered to the users of the resources made available via the potential node? (text)
8. What is the added value that you see for you and for your users in contributing to the EOSC Federation? (text)
9. Please add any additional remarks you would like to make about the EOSC Federation (text)
10. Upload supporting documents (optional)

meosc

Q&A

European Open Science Cloud

Update on policy developments

*Michael Arentoft
Open Science and Research Infrastructures
European Commission*

20 June 2024

EOSC, for the digital transformation of research

- An effective **policy process** to mobilise, align and scale resources and engagement across Europe towards accelerating open science, higher quality, productivity and reproducibility in research.
- An open and trusted federation of collaborative, autonomous infrastructures applying agreed, consensus-based EOSC policies and rules of participation, combined into a system of systems to enable European researchers to store, share, process, analyse, and reuse research digital objects (e.g. data, publications and software)

Letta report on empowering the Single Market:

<https://www.consilium.europa.eu/media/ny3j24sm/much-more-than-a-market-report-by-enrico-letta.pdf>

*“A **fifth freedom** to enhance R&I and education in the single market”*

*“A central pillar of this strategy is the **creation of a European Knowledge Commons** – a centralised, digital platform providing access to publicly funded research, data sets, and educational resources. ...”*

*“ ...**empowerment of our research infrastructures**: By facilitating access to laboratories, digital platforms, and cutting-edge equipment across Europe, we equip our research community to take on complex, multidisciplinary challenges vital to our collective future. This interconnected ecosystem transcends individual institutions or nations.”*

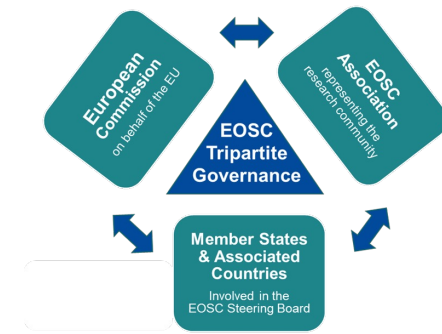

Draghi report on EU competitiveness (to come).

Pressing topics for R&I and EOSC

- “*Successful and timely uptake of **Artificial intelligence** in science in the EU*”. Report by Group of Chief Scientific Advisors (March 2024).
 - “*Keep building and developing large multipurpose interoperable datasets linked to European data spaces (e.g., **European Open Science Cloud**, DestinE), and develop interoperability standards.*”
 - “*Provide EU researchers with fair access to representative, high-quality datasets irrespective of their field of research, geographical area or affiliation while preserving privacy and ownership rights.*”
- The Council Recommendation on enhancing **Research Security** (May 2024) addresses security risks arising from international research collaborations in a changing geopolitical context, while maintaining **openness** and safety.
- Council Conclusions on **Knowledge Valorisation** (May 2024) calls for transforming research and innovation knowledge into tangible benefits for society.
 - “*Art. 26. HIGHLIGHTS that open science practices enable the valorisation of knowledge. This includes ensuring that **research digital objects are FAIR-by-design.***”

EOSC Tripartite collaboration

(EC +MS/AC +EOSC-A)

- **EOSC pre-2027.** Launching of the “Tripartite Group” in April 2024 *to prepare commonly agreed positions, to support the decision making and strategic guidance of the Tripartite governance on issues related to the EOSC Federation, such as:*
 - The requirements and procedures for enrolling EOSC nodes
 - Definition of policies and rules to be applied across the EOSC Federation.
 - Development and evolution of an “EOSC Federation Handbook”, coordinated by the EOSC-A
- **EOSC post-2027.** Discussion on future governance, finance and operations of EOSC
 - Considering Tripartite Governance, contributions of the different parties, further development and deployment of the Federation.
 - Providing input to the next Framework Programme.

Inputs for strategic orientation

Fair Data productivity and advanced digitalization of research
An opinion paper
by the ESFRI-EOSC Task Force and Steering Board expert group (E03756)
March 2024

Prepared by:
ESFRI-EOSC Task Force

Disclaimer: The views and opinions expressed in this publication are those of the contributing authors and do not necessarily reflect the views or positions of ESFRI and EOSC Steering Board or any other entities they represent.

- EOSC Partnership and the EOSC Strategic Research and Innovation Agenda
- EOSC SB opinion paper on “FAIR Data productivity” (May 2024):
 - Focus on supporting enhanced Quality Assessed FAIR Data productivity across the research life-cycle in all domains.
- EOSC SB opinion paper on “Advanced digitalisation of Research” (May 2024)
 - Advanced digitalisation as enabler of optimal use of unique research resources as Research Infrastructures and foster novel research workflows with variable degrees of automation.
 - Artificial Intelligence as a key service and motor for EOSC-Science Exchange and a research infrastructure in itself, of specific (thematic) and general (mission-oriented) value.
- ESFRI-EOSC Task Force, launched in June 2023.
 - TF Goal: to stimulate and enable the connection of ESFRI RIs and ERICs to the EOSC federation;
 - ESFRI-EOSC TF Milano Workshop and opinion paper, feeding into the SB papers (March 2023)

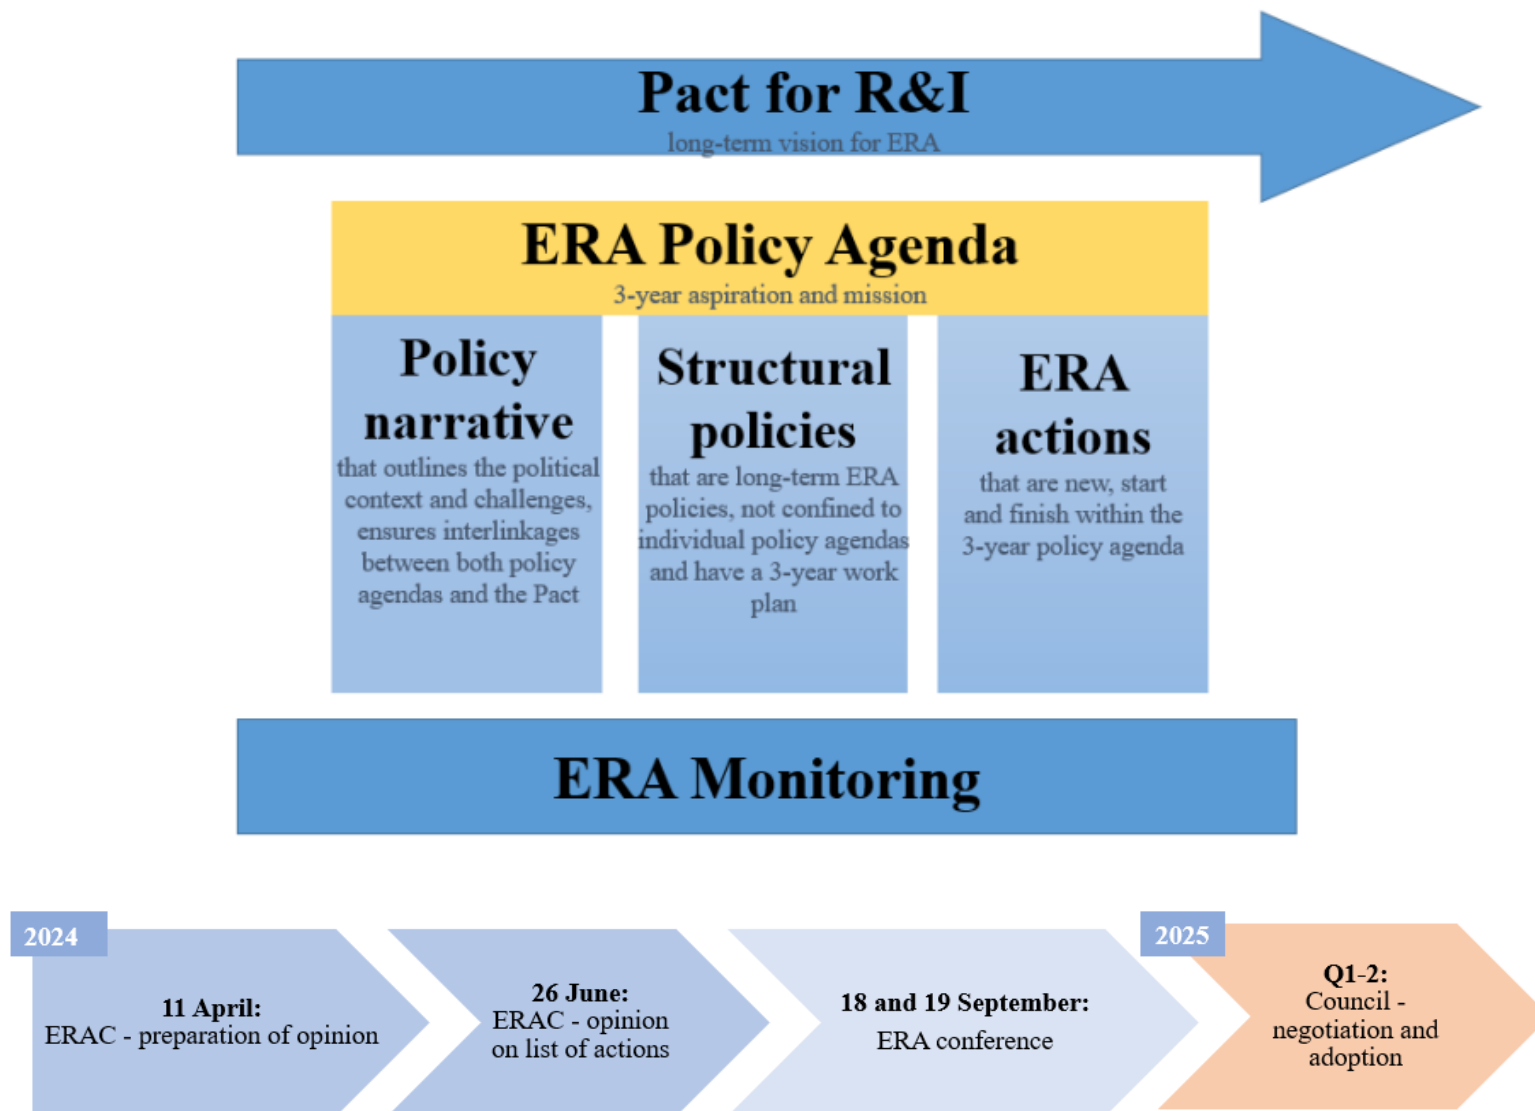

HE Research Infrastructures WP. Strategic Orientations 2025-27

- Destination 1. Consolidation and evolution of research infrastructures, research infrastructures services, and technology development
 - 1.1. Consolidation and evolution of Research Infrastructures.
 - 1.2. RI services to support large research domains, societal challenges and EU priorities
 - 1.3. Next generation of scientific instrumentation, tools, methods, and advanced digital solutions of RIs and fostering innovation and co-creation with industry
- Destination 2: European Open Science Cloud (EOSC), Destination Earth (DestinE) and pan-European National Research and Education Networks
 - 2.1. Enabling an operational, open and FAIR EOSC ecosystem.
 - 2.2. Destination Earth (DestinE)
 - 2.3. Ensure state-of-the-art connectivity across Pan-European NRENs

WP 2026-2027: indicative adoption Q3/Q4 2025

Proposed structure of the next ERA Policy Agenda 2025-2027

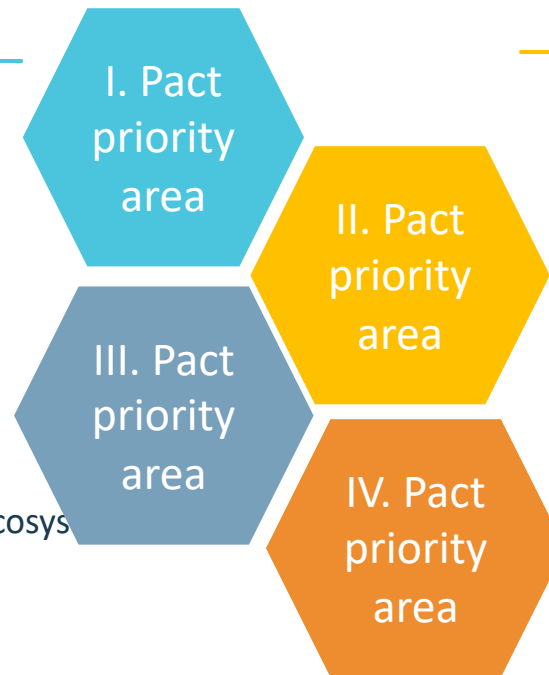

Next ERA Policy Agenda 2025-2027: Current proposals

Deepening an internal market for knowledge

- **Enabling Open Science**
- Equity in Open and Responsible Research
- **Research Infrastructures**
- Inclusive and intersectional gender equality
- Research Careers
- Research Assessment
- Knowledge Valorisation
- Freedom of Scientific Research
- Fundamental research and scientific leadership
- Establishment of a European Science for Policy ecosystem
- **AI in science and research in the EU**
- Global Approach to R&I
- Knowledge Security

Research and innovation excellence

- Improve EU-wide access to excellence
- An new ERA for Research Management

Green and digital transition

- Revamping the SET Plan (merger with Renewable Energy Valleys, tbc)
- Greening Research: first steps towards sustainable research practices
- Non-animal approaches in biomedical research and testing pharmaceuticals
- A harmonised framework to support integrity and ethics in R&I
- Unleashing the full R&I potential of Europe's universities
- Industrial transformation for Europe's competitive sustainability and strategic autonomy
- Citizen Engagement, including trust in science for a stronger and more democratic European society

Investments and reforms

- An R&I foresight community of practice

The value proposition of the EOSC federation

- **economies of scale:** EOSC nodes will take advantage of commonly pooled resources and functionalities, enabling them to focus on their core business.
- **interdisciplinarity:** EOSC will make a step change in fertilising research that cuts across established disciplinary boundaries, while increasing visibility and re-use of discipline-specific data and services.
- **research security:** researchers will find in EOSC a trusted and sovereign environment where they can securely store, analyse and share their results and collaborate with their peers within and across disciplines.
- **enabling AI:** by pooling massive amounts of high-quality FAIR research data, software and compute, and by connecting to other common European data spaces, EOSC aspires to become a key driver of European leadership in AI for science.
- **policy implementation:** infrastructure and service providers that will enrol in EOSC will seamlessly comply-by-design to the EU's research and digital policies that are enshrined in the rules and policies of the EOSC federation.

Thank you
