

EOSC and the Digital Twins

Questions posted on Slido

- What is the interest for businesses (eg BAYER) to participate in digital twin projects?
- If and how fair/open science principles are applied to other components of twins besides data (e.g. models, visualizations, analytical algorithms, etc)
- The AI/ML parts seem important to make sustainable use of the DTs. Are you building communities around the models and algorithms?
- Do you really need EOSC at all? What for?
- Why is EDITH (European Virtual Human Twin) not integrated into this EOSC project?
