

EOSC Federation Handbook

Questions posted on Slido

- What will the roll of EOSC-A be relative to the EOSC Federation?
- Will there be a comprehensive searchable interdisciplinary catalogue for all datasets available through EOSC?
- What level of detail the handbook goes/can meaningfully go on interoperability requirements for the nodes?
- Based on the handbook, what is an EOSC node?
- Will it explain how to flag which source we want you to use for the ressources hub ? now it is too unstructured and difficult to search, no quality check.
- Is the Handbook taking into account results from EOSC projects and how ?
- Who will overlook the handbook once it's finished and published? Tripartite, or some other body?
- Hand-book: a small book of facts or usefull information about a particular subject. please keep it - small book!
- Counting the number of reuses for different disciplines implies existing metrics. What should be the "one" that is counted, i.e. what is "a dataset"?
- While you have an inclusive team, in writing the handbook, did you already identify some fields/domains/stakeholders that are missing?
- We heard today some ideas for potential national or thematic nodes models. Ludek referred to a model based on horizontal Elnfras. Have such discussions started?
