

# Getting ready for the EOSC Federation: perspectives of different stakeholders (Part 1)

## Questions posted on Slido

- What are you doing in your country to prepare for the EOSC federation ? Do you have recommendations for other countries?
- Will your countries provide enough funding for national nodes?
- Do use cases for EOSC differ across member states? Some countries already have very good services for their researchers, others don't.
- What are you doing in your country to join the Federation with National or Thematic nodes?
- What kind of contribution do you want to see attributed to EOSC that will help promote EOSC?
- When will your national nodes be available?
- What will a successful landscape look like in five years time? What metrics are being used to define success?
- What is the added value for existing free services available to all worldwide to onboard on EOSC Will they be restricted by credits and access rules for non EU?
- Will (the lack of) willingness of interdisciplinary research be the bottleneck of success?
- Should eoscs be on the next esfri roadmap? It could be helpfull to gain political support and support from end users. Your opinion?
- How will access to Open or FAIR data across Europe work in a federated system?
- What is needed from the researchers?
- Do you see a role for elnfastructures to supply services at national level especially applied to cross border services
