

Getting ready for the EOSC Federation: perspectives of different stakeholders (Part 2)

Questions posted on Slido

- Do your communities want to become thematic nodes?
- What do existing infrastructures need to enroll and onboard as a data node in EOSC Federation? Will/can they implement necessary adaptations?
- Do you expect that EOSC will solve the data storage/archive bottlenecks you described, for example in the Instruct Centers?
- What role(s) would your organizations/communities like to play in creating/maintaining the EOSC Interoperability Framework?
- if a RI has all access worldwide for free, what happens with the restrictions for EU only and credits system ? Will they need to comply and change their model?
