

Unconference | No data without software!

Questions posted on Slido

- How can good software management be integrated into EOSC?
- How do we become less dependent on proprietary (commercially licensed) standard research software, e.g. for qualitative data analytics or commercial LLMs?
- Can Uni (of Applied Sciences) still exist without a team of research software developers?
- Who has "ownership" of research software?
- Are the panel aware of the EVERSE project which is an EOSC project. <https://everse.software/>
- How do you see collaboration between professional software companies and academic developers?
- What domain-specific aspects need to be addressed to enable FAIR research software?
