Case study

The Social Sciences and Humanities (SSH) Open Marketplace is a discovery portal supported by DARIAH, CESSDA, and CLARIN. It pools and contextualises resources for social sciences and humanities research, including tools, services, training materials, datasets, and publications. It highlights research practices, aggregates well-curated resources, and provides contextualisation, making it more than just a catalogue.

DARIAH-EU

cessda

CLARIN

Added value

- **Contextualising software and services** with screenshots, tutorials, and links to datasets, training materials, and publications.

- Supporting **community-based collection and description** of digital methods and workflows in the social sciences and humanities.

- Aggregating heterogeneous (meta) data, using multiple classification schemas and connecting them to external identifiers through a **flexible metadata schema**.

France, Norway, Netherlands

The EOSC Macro-Roadmap is supported by ∞ eOSC | Focus · Funded by the European Union

Problem addressed

SSH Open Marketplace addresses the urgent need of the social sciences and humanities community for a place to gather and exchange information about their tools, services, and datasets. While many project websites, service registries, and data repositories exist, the lack of a centralised platform integrating these assets and offering domain-relevant means to enrich and communicate them is evident.

EOSC integration

The SSH Open Marketplace is a thematic Contribution to the European Open Science Cloud (EOSC).

The SSH Open Marketplace is maintained by three European Research Infrastructures Consortia (ERIC), DARIAH, CLARIN and CESSDA, as part of the SSH Open Cluster.

Join us and contribute

Join a growing community of social scientists and humanists, become a contributor and improve the SSH Open Marketplace by curating existing records or creating new ones in the catalogue.

You can not find your favourite tool? Do you see a mistake in the description of a training material? The methods and standards in use in your discipline are not well represented in the catalogue? Log in and contribute!
